Kenmore coldspot refrigerator water filter

how to replace kenmore coldspot model 106 water filter Refrigerators are important, but they are equally expensive. For this reason, it is important to keep the refrigerator clean and well-maintained. One way of doing so is replacing the water filter from time to time. So, if you don't know how to replace the Kenmore Coldspot model 106 water filter, we are sharing the instructions with you. First of all, you have to purchase the water filter according to the refrigerator model. In your case, you have to purchase the water filter for Coldspot model 106 because only those filters will work. These filters can be easily purchased from the appliance stores or online, and the price ranges from \$25 to \$30. Now that you have the water filter, let's have a look at the instructions; Locating The Filter Compartment When it comes down to locating the filter compartment, it depends on the type of fridge. Since Kenmore Coldspot model 106 is the French door refrigerator, you need to check the door and identify the lowest shelf/compartment. If you are unable to locate the filter compartment, just use the user manual or look for a small dial around the drawers. When you locate the compartment, push or pull the button to open the compartment, and you will be able to see the filter. Taking Out The Old Filter Now that you can see the old water filter, you have to twist it in the anti-clockwise direction, and the filter will be loosened up. When it is loosened up, pull it out to take it out. On the other hand, if you aren't able to twist the filter, try to pull it out in a straight direction. When the filter is out, simply dump it in the bin or add it to the recycling can. However, when the filter is out, don't forget to place a hand towel under the filter because it will drip water. Adding New Filter Now, you have to take out the new water filter and look for the cap. When you find the cap, pull it off, and you will see the port. This port is used for connecting the water filter to the Kenmore refrigerator. In addition, there are chances that your water filter will have foil covering, so don't forget to remove that before installing the filter in the refrigerator. Install the new filter into the filter compartment, and you must keep it horizontal. A horizontal position will ensure that filter lines with the refrigerator's threading for screwing. Once it's lined, turn the filter in a clockwise direction to make sure the filter stays in place. When the filter is properly attached, you can close down the compartment, and it will be sealed in place. On the other hand, if you are having a hard time screwing the filter in, push its port into the filter's end. Reset When the new filter is properly installed, press the filter reset button located near the water dispenser. You will need to press this button for three to five seconds, and it will comply with the new water filter. Are you questioning how to replace water filter in kenmore coldspot refrigerator? Have you changed your water filter after six months to use your refrigerator?. Once you buy your new filter which will install and replace it with an old one whenever you open up the package you're going to get the new filter a sticker to go on the inside of your fridge to tell you when to change the filter and the filtered datasheet. there are a few different types of these filters and they all have a six-month or a certain gallon that they're actually good for some fridges actually have an indicator system that the light comes on and tells you when to change the filter before we take the filter out. In this article we'll show you how to replace water filter in kenmore coldspot refrigerator moreover we'll show you how to change Kenmore elite refrigerator water filter, how to replace Kenmore refrigerator water filter 9690. But before we start you may know. Where is the water filter on a kenmore coldspot refrigerator? Most water filters are positioned within the grille on the backside of the fridge or the back, upper-right corner of the fridge. Some models, often older ones, have the filter on the outside at the back of the fridge on the water supply line. Where is the water filter on elite fridge? Most water filters on the elite fridge are located inside the refrigerator on the top back of the refrigerator, the upper-left corner of the inside refrigerator. before start; keep in mind anytime you work on a piece of equipment make sure it is unplugged or the circuit breakers are off so there's no chance of electrocution. How to replace water filter in kenmore coldspot refrigerator you may want a little hand towel down on the floor to catch any water that comes out in order to take the old filter out of the fridge. you'll need a 1-gallon pitcher as you will have to swap out 4 gallons of water once you replace the filter to flush the system once you have installed the new filter Step1. Take out the older water filter. Get down to the bottom of the fridge and find your filter on the right corner on the grill refrigerator. Once you find your water heater you notice that there is a button next to the filter push on that button release and then your tap on the top of your filter.Push the button in.pull the water filter straight out the pull the filter out. Once you pull out the filter. Step2. Install the new water filter. take the new filter out of the package on the top of your filter you're going have a protective dust cap remove that . Take your new water filter and slide within the plastic cap that you removed from the previous filter until you line up the marks. in order to put the new filter in all you have to do is: line it up with the filter housingpush it in till you feel it seat, it will lock it into place once you finish the installation of the new water filter. Step3. Flush out the fridge. flush out the 4 gallons of new water get your one gallon pitcher and put within the dispenser. burn your 4 gallons of water one thing you prefer to try to do is reuse that water if you have some plants inside a garden outside anywhere you can use some water outside of drinking it as you want to wait till you've burned the 4 gallons of water and cycled out the system with the new filter. you can also just take it to downpour down the sink there make sure you get 4 gallons out your system has been flushed and you're ready to use your new filter. How to change kenmore elite refrigerator water filter? most of the water filter replacements are going to be up on the top of the fridge. the water filter is just a matter of pushing. If this sticker is missing, there's actually a little push button right You push that in. step1. Remove the old cartridge (old filter) push within the button both sides of the water filter cover and it just snaps out of place. And then you have the water filter. Note: replacing the filter causes a small amount of water (around oz, or 25 cc) to drain. Place a cup under the filter hole to catch any waste.Pull the cartridge (old water filter) downward.Pull out the filter cartridge (water filter). Note: when opened at the full angle the cartridge should easily come out Step2. Install the new cartridge (new water filter) Take the new cartridge (new water filter) out of its packing. remove the protective cover from the O-rings.With cartridge ears within the horizontal position.Push the new filter cartridge into the manifold hole until it stops.Firmly lock in cartridge the cover will click on back into place. Note: after changing the filter. Step3. Flush 2.5 gallons through filter Before use (flush for approximately 5 minutes) Check the filter for leaks. Step4. Reset the water filter When the water filter indicator displays the message O Filter month Reset the water status display and indicator light by pressing and holding the light/water filter button for at least 3 seconds. Note: filter Bypass plug Keep the filter bypass. You must use the filter bypass plug when a replacement filter is not available. Ice maker will not operate without the filter or filter bypass plug inserted within the correct compartment. How to replace kenmore refrigerator water filter 9690? Step1. Before installing your new filter, soak it in water for 15 minutes. Step2. Press the button to open the filter cover. Step3. Pull the old filter down, then remove it. Note: If you have a Kenmore fridge, check if there is a plastic or metal cap that covers the top of the old filter. If there is, pull off the cap and connect it to your new filter. If there is not, continue to step 4. Step4. Push the new filter into the compartment horizontally till it stops. Step5. Push up firmly so far as it will go. Step6. Close the filter cover until it clicks into place. Step7. Run 2-3 gallons of water through your fridge to remove air and lose carbon pieces. Read also: BEFORE USING YOUR FILTER If your fridge has a change filter indicator, reset it. To reset it: Press and hold the reset button for 3 seconds.
